Germany –Top Ranked Courses Top Universities

Engineering:

By far the most popular and one of the top courses to study in Germany, **engineering** which mostly translates into an MS degree, attracts nearly 25% of international students to the country or over 71,000 international students reflecting the popularity of the course in the international circles. Some of the engineering specialisations that students opt for are Mechanical Engineering, Automotive Engineering and Electrical Engineering, among others. Some of the top universities in Germany like Technical University of Munich, RWTH AACHEN and Karlsruhe Institute of Technology rank among the top 100 in almost every engineering specialisation. Further, the country is most recognized for its contribution to the automotive industry. With a workforce of over 700,000, the automotive industry in Germany is perhaps the biggest employers in Germany and also the largest industry in the country.

Top courses to study in Germany- Best engineering colleges

No.	University	Ranking
1	Technische Universität München	30
2	Technische Universitat Berlin	47
3	RWTH AACHEN	53
4	Karlsruhe Institute of Technology	62
5	Universitat Stuttgart	107

Business Management:

While engineering dominates the scene, **management studies** don't stand too far in the list. In fact, business schools in the country are well known across the world offering one of the top courses to study in Germany. Take the Manheim Business School, for example. It is not just the **best business school** in Germany but also falls among the top 100 business schools in the world according to major rankings like FT and QS.

Interestingly, it is not just the full-time MBAs that German universities are known for. Many German universities also rank among the top executive MBA providers in the world.

Fine and Applied Arts:

Fine Arts is an unusual field to be listed among the top courses to study in Germany. With 24,000 international students pursuing the course, it is popular in a country where technology is king. Interestingly, arts and design in Germany are taught less in a theoretical structure. Students are, in fact, allowed to work independently in their studios, and classes are organized through discussions among students where they can put forward their projects for critique. Professors in this case become more of feedback givers than teachers.
